Transition Sunnyside is a project of the Sunnyside Neighborhood Association's Sustainability Committee to inspire a community-level conversation about how to begin shifting our patterns of living away from a heavy reliance on fossil fuels (oil, gas, grid-supplied electricity) and toward more local alternatives for food, transport, household energy, and water.

The lecture series will feature films, guest speakers, round table discussions, and workshops. For updates and more details visit:

www.sunnysideneighborhood.com/ and click on Sustainability
